EXPERIENCE

PT. Telkom Akses. Tasikmalaya - Indonesia 2017- Until Now

As a Fiber Optic Network and Gas Station Digitalization Engineer, you will be responsible for the design, installation, configuration, and maintenance of fiber optic networks that support the operations of gas stations. Your primary duties will include:

- Fiber Optic Installation and Configuration: Oversee the installation and splicing of fiber optic cables to ensure optimal connectivity across the gas station systems.
- Testing and Troubleshooting: Conduct thorough network testing to ensure optimal performance, and lead the identification and resolution of connectivity issues.
- Maintenance and Repair: Manage routine maintenance and coordinate repairs of network infrastructure to minimize downtime.
- Gas Station Digitalization: Lead the implementation and integration of digital systems at gas stations, including payment systems, monitoring, and automated control systems.
- Documentation: Prepare and maintain detailed technical reports and documentation related to the installation, maintenance, and troubleshooting of the network.
- Coordination with Teams and Vendors: Collaborate with internal teams and external vendors to ensure that network and digitalization projects are executed efficiently and meet established standards.

EDUCATION

Perjuangan University
Bachelor of Computer Science
2019-2024

SKILLS SUMMARY

Skill	Level
Networking & Fiber Optic	87%
IT Support & Troubleshooting	80%
Server & Data Center Infrastructure	77%
Web Development (HTML, CSS, JS)	51%
